

IN THE CLAIMS

1. (Currently amended) A method for manipulating receipt data, the method comprising:
selecting a first line item from a first electronic receipt, thereby forming [[a]] an electronic list; [[and]]
storing the list on a data farm; and
authorizing a group of people to review the list.
2. (Original) The method of claim 1, further comprising the step of
reviewing the list, the reviewing performed by one of the group of people.
3. (Canceled)
4. (Canceled)
5. (Previously presented) The method of claim 2, further comprising the step of
placing an order for the first line item by one of a consumer and a shopping-service.
6. (Original) The method of claim 2, wherein the step of reviewing comprises viewing and
commenting on the list.
7. (Original) The method of claim 1, further comprising the step of
selecting a second line item from the first electronic receipt and adding that second line
item to the list.
8. (Original) The method of claim 1, further comprising the step of
selecting a second line item from a second electronic receipt and adding that second line
item to the list.

9. (Currently amended) A method for purchasing goods, including services, from multiple merchants, the method comprising:

selecting first and second goods for purchase on respective first and second websites;

[[and]]

paying for the first and second goods through the second website with one transaction from a consumer perspective[.]; and

generating an electronic receipt for the transaction, the receipt including a line item for each of the first and second goods.

10. (Original) The method of claim 9, wherein the step of paying comprises

automatically placing first and second orders for the first and second goods with the respective first and second websites.

11. (Canceled)

12. (Currently amended) The method of claim 10, further comprising the step of retrieving [[an]] the electronic receipt record of the first and second orders.

13. (Previously presented) The method of claim 10, further comprising the step of viewing an advertisement during the step of paying.

14. (Original) A method according to claim 1, further comprising:

participating in a first transaction at a first merchant, thereby generating said first electronic receipt.

15. (Original) A method according to claim 8, further comprising:

participating in a first transaction at a first merchant, thereby generating said first electronic receipt; and

participating in a second transaction at a second merchant, thereby generating said second

electronic receipt.

16. (Original) A system for manipulating receipt data, the system comprising:

a first e-merchant operable to generate an electronic receipt;

a data farm coupled to said first e-merchant and configured to store said electronic receipt; and

a shopping service coupled to said data farm and configured to retrieve said electronic receipt for a consumer and allow the consumer to select a line item from said transaction record, thereby creating a review list.

17. (Original) A system for manipulating receipt data according to claim 16, further comprising:

a second e-merchant coupled to said data farm and operable to generate a second electronic receipt, said data farm further configured to store said second electronic receipt; and said shopping service further operable to retrieve said first and second electronic receipts.

18. (Original) A computer program product for manipulating receipt data comprising a computer readable memory and a program module, the program module including instructions directing a processor to:

select a first line item from a first electronic receipt;

storing the selected first line item in a storage location to form a list; and

authorize a group of people to review the list.

19. (Original) A computer program product according to claim 18, wherein the program module further includes instructions directing a processor to:

select a second line item from a second electronic receipt and adding that second line item to the list.
